

Please do not allow Low Power FM to take precedence over translator stations such as KLOVE and AIR1. These stations provide an invaluable resource to mine and other communities by broadcasting consistent good-values messages and music that apply to a broad age group. If KLOVE and/or AIR1 were taken off the air, many families would have to go without this positive influence in a time when family is under intense attack from every side. It is without question that family oriented programming is in the interest of every community, including mine, and the world. Please do not make the mistake of giving LPFM precedence.

Thank you.
